

TOOL HOLDERS AND CLEANING SPONGES

Soldering and desoldering devices are heating devices and, depending on the application, can attain high temperatures during operation. This equipment must never be operated without supervision;

during longer interruptions of work they should be switched off and always be stored in suitable tool holders.

Most of the **Ersa tool holders** are made of metal or heat-resistant duroplastic, and

most are antistatic. Most holders have a viscose or dry sponge for tip cleaning, as well as options for conveniently resting and storing soldering and desoldering tips.
