

SSP-100 POLISHING AGENT

Description

Kema SSP-100 is used for cleaning, protecting and refreshing steel surfaces. It gives renewed shine to the surfaces and leaves them looking good. Can be used on other surfaces such as laminates, vinyl etc. Fast process to get a nice expression on your materials.

Properties

- for steel- and plastic surfaces
- cleans and protects stainless steel surfaces in one working procedure
- gives renewed shine

Direction for use

Apply KEMA SSP-100 to the surface and give it time to work for a short while. Polish afterwards with a lint-free cloth. Only a small dose of the product is necessary. Be sure to polish until all excess product is gone. Lack of polishing will make the surface appear greasy and it will collect unnecessary dirt. Correct dosing reduces consumption and thereby makes the product last longer.

Technical and physical data

Part number	16307
Contents	750 ml Trigger
Colour	Transparent/clear liquid
Odour	Neutral
