Test conditions:

Simulant:

B: acetic acid at 3% in aqueous solution

C: ethanol at 20% in aqueous solution

Time and Temperature:

2 hours at 70°C (repeated use)

2 hours at 70°C (repeated use)

The simulants and test conditions were chosen according to Regulation (EU) n. 10/2011 (annex III tab. 1 and annex V tab.3)

The overall migration limit, together with the other specific restrictions to which the monomers and/or additives present in the material may be subject, are respected in the above-mentioned conditions of use. This statement has been supported by analytical tests conducted in accordance with Regulation (EC) n. 10/2011 and Ministerial Decree 21/03/1973 or on the basis of calculations made by considering the content of the substances subject to migration limits. The calculations were made assuming that 1kg of food is in contact with 6 dm² of the material.

Dual-use additives. In the hose there are the following substances regulated by Regulations (EC) N. 1333/2008 (food additives) and 1334/2008 (flavourings), and its amendments:

E 171	Titanium Dioxide;
E 470a	Sodium, Potassium And Calcium Salts Of Fatty Acids;
E 479b	Thermally Oxidised Soya Bean Oil Interacted With Mono- And Diglycerides Of Fatty Acids;
E 570	Fatty Acids;

According to experimental data and/or theoretical calculations such substances comply with the requirements of Article. 11 of Regulation (EU) No 10/2011 paragraph 3, letters "a" and "b" of D.M. 21/03/1973.

This declaration will be updated in the event of changes in formulation of the material or if the legislative references are modified and updated so as to require a new check for compliance purposes.
