

Brown fused Alumina NK

Description

Standard brown corundum – used for the most demanding applications in the abrasive and refractory industries and as a non-ferrous jet material in surface treatment.

Typical Chemical Analysis

Al ₂ O ₃	95,20	%	CaO + MgO	0,30	%
TiO ₂	2,90	%	SiO ₂	1,20	%
Fe ₂ O ₃	0,30	%			

Technical Data

Colour:	brown
Density:	3,9 g/cm ³
Hardness:	Mohs 9
Grain shape:	cubic

Available Grits

FEPA-F Grits
Metric Grits

Other granulations according to agreement

Package

50 / 25 KG paper bags
1 - 1,5 to Big Bag's
