Service and disposal of luminaires

Acc. to EU regulation 245/2009

Instruction for luminaire service

Replace aged or failed lamp/LED	Switch Off	Open luminaire	Remove old lamp/LED	Fit new lamp/LED	Refit optic
					

LED

Preventing electrostatic damage

A discharge of static electricity may damage LED components.

Connect a wristband to the housing by a ground cord.

Avoid touching LED with bare hands.

Instruction for end of life and components disposal - For emergency lighting

Switch Off	Remove lamp for disposal (not for LED)	Remove battery for disposal	Remove luminaire for disposal	Dispatch materials to recycling
				

Instruction for end of life and components disposal

Switch Off	Remove lamp for disposal (not for LED)	Remove luminaire for disposal	Dispatch materials for recycling
			

DK/S/N: Produktet skal efter produktets levetid afleveres hos affaldsforarbejder - Kontakt din lokale leverandør eller leverandørens hjemmeside for yderligere information.

UK: When the product reaches the end of its service life; it must be delivered to a waste disposal facility. Contact your local supplier or visit their website for more information.

D: Das Produkt muss nach dessen Lebenszeit bei entsprechenden Abfallensorgungsstellen entsorgt werden. Für weitere Fragen kontaktieren Sie Ihren lokalen Lieferanten oder besuchen die Homepage des Lieferanten.

FIN: Tuote on toimitettava elinikäänsä päätyttyä elektroniikkaromun kierrätykseen. Tarkempia tietoja saatte ottamalla yhteyttä toimittajaanne tai toimittajan internet-sivuilta.

E: Una vez que el producto haya alcanzado el final de vida, debe ser eliminado en los correspondientes puntos de reciclaje. Para más información rogamos contacten con su proveedor local o consulten la página web del mismo.

Instruction for luminaire cleaning

Cleaning:

Most of the items can be cleaned with a soft liquid soap and water with a maximum temperature of 60°C. The use of washing liquids containing abrasive or solvents is not advised as it causes damage to the surface.

Guideline for Cleaning of Material:

It is important to clean the luminaire in the right way to avoid damage.

Powder coated sheet steel
Reflector in aluminium
Cross blade louvre in aluminium
Cross blade louvre in sheet steel
Polycarbonate cover
Acrylic cover
Glass cover
ABS plastics
ASA plastics

Damp, lint-free cloth, soft liquid soap.
Dry, lint-free cloth.
Dry, lint-free cloth.
Damp, lint-free cloth, soft liquid soap.
Clear water of maximum 60°C
Clear water of maximum 60°C
Clear water of maximum 60°C
Clear water of maximum 60°C
Clear water of maximum 60°C

Cleaning Aluminum Reflectors and Double Parabolic Louvres

Before cleaning, gently dust to remove scratch-inducing particulate matter.

To clean, choose one of the following methods:

Rub gently with a clean, dry lint-free cloth (cheesecloth is excellent). This often works on "normal" stains, such as spots or greasy fingerprints. Avoid hard brushing.

Dampen a clean, dry, lint-free cloth with Isopropyl (rubbing) alcohol. Rub gently on louvre. Louvre or reflector will streak as alcohol is applied, but streaks disappear as alcohol evaporates.

Use an aluminium reflector cleaner.

Use of gloves is recommended when handling to prevent fingerprint marks. Some people have a high acidity in their perspiration, causing fingerprints to etch into anodised aluminium material. There is no method to remove fingerprints of this type.

Note: Do not use these methods on polystyrene or acrylic louvres.

Cleaning Interval:

Lighting fixtures should be cleaned periodically, when dirty and in connection with the lamp change - min. once a year.

Warranty information

DK/S/N: Dette armatur må kun bruges til belysning og skal installeres i overensstemmelse med gældende installationsbestemmelser. Enhver anden brug eller installation vil betragtes som "ikke i overensstemmelse med montagevejledning".

UK: The lamp is used exclusively for lighting and is to be installed in accordance with the national installation regulations. Any other use or installation is regarded as "not according to instructions".

D: Die Leuchte dient ausschließlich der Beleuchtung und ist entsprechend den nationalen Errichtungsbestimmungen zu installieren. Eine andere Nutzung oder ein anderer Einbau gilt als „nicht bestimmungsgemäß“.

FIN: Valaisin on tarkoitettu ainoastaan valaistuskäyttöön, ja se on asennettava kansallisten määräysten mukaan. Muu käyttö tai muu asennus katsotaan sopimuksenvastaiseksi käytöksi.

E: La Lámpara está destinada exclusivamente a la iluminación y debe ser instalada de acuerdo con las pertinentes normas nacionales. Cualquier otro uso o instalación no se considerará "previsto por la norma".

DK/S/N: Installation og tilslutning må kun udføres af autoriseret personale.

UK: Installation and commissioning may only be carried out by authorized specialists.

D: Die Montage und Inbetriebnahme darf nur von autorisiertem Fachpersonal durchgeführt werden.

FIN: Asennuksen ja käyttöönoton saa tehdä vain auktorisoitu ammattihenkilöstö.

E: El montaje y la puesta en marcha sólo puede ser realizado por personal especializado autorizado.

DK/S/N: Isolation/Megger Test. Kortslut Fase (L) & nul (N). Test mellem L/N og jord. Test med max 500 V DC. Se yderligere EN-61557 - Electrical safety standard.

Note: Isolationstest mellem fase/jord, nul/jord eller fase/nul kan ødelægge HF enheden.

UK: Isolation/Megger Test. During measurement, connect Live and Neutral together and measure between Live/Neutral and Earth.

Measure with max 500 V DC. See also EN-61557 - 'Electrical safety standard'

Notice: Isolationstest between Live/Earth, Neutral/Earth or Live/Neutral will damage the HF control gear.

D: Isolationstest. Zur Messung die Phase und den Nullleiter miteinander verbinden und zwischen Phase/Null und Schutzleiter messen.

Messung mit max. 500V DC. Siehe auch EN-61557 - "Elektrischer Sicherheitsstandard"

Merke: Isolationstest zwischen Phase/Schutzleiter, Nullleiter/Schutzleiter oder Phase/Nullleiter kann das Elektronische Vorschaltgerät beschädigen.

FIN: Eristysvastusmittaus. Varmista jännitteettömyys !

Kytke vaihe (L) ja nolla (N) yhteen ja mittaa eristysvastus tämän yhdistelmän ja suojaamaan (KeVi) väliltä.

Sallittu mittausjännite max 500 VDC. Katso tarvittaessa EN-61557 - Electrical Safety Standard

Huom! Muut mittaukset vaurioittavat liitäntälaitteen elektroniikkaa.

E: Test de aislamiento. Para la medición unir la fase y conductor neutro y medir entre fase/neutro y toma de tierra. Medición con max. 500V DC. Ver también EN-61557 - "Estándard de la Seguridad Eléctrica"

Nota: Test de aislamiento entre fase/toma de tierra, conductor neutro/toma de tierra o fase/conductor neutro puede dañar la reactancia electrónica.
