Basic material	plastic
Packaging	loose (1)

EXTENDED  
REACH

SAFE  
CUTTING

STRONG  
CONNECTION

3/4-5 ACME  
THREAD

## SAFE CUTTING AT DISTANCE. THANKS TO NEW CONNECTOR OPTIONS.

Materials requiring cutting can often be too high or too far away, making it difficult to reach them. The new CONNECTOR from MARTOR helps you to overcome distances when cutting.

### EXTENDING REACH

The CONNECTOR can be attached to a (telescopic) pole with a 3/4-5 ACME thread. This gives you extra long reach to enable safe and efficient cutting.

### PERFECT COMBINATION

Our versatile SECUMAX 350 and SECUMAX 150 safety knives are particularly easy to combine with the new CONNECTOR and provide a very strong connection. You not only extend your cutting tool's reach, but also its range of uses.

SECUMAX 350 WITH CONNECTOR

SECUMAX 150 WITH CONNECTOR

THE SAFER WAY TO CUT.

# CONNECTOR NO. 9946

## TECHNICAL FEATURES

An adjusting screw provides flexibility to change the angle of the CONNECTOR angle. Various settings are available.

After form-fitting one end to the knife, a pole (not included) with  $\frac{3}{4}$ -5 ACME thread (length: at least 40 mm) can be attached to the other end.

Disposable knife

## VERSATILE USAGE – EXAMPLES

## APPROVED SAFETY

The CONNECTOR enables you to work safely and efficiently. GS certification is retained for the knife when it is being used with the CONNECTOR. The GS mark certifies that our products meet the requirements of Section 21 of the ProdSG (German Product Safety Law).

## TELESCOPIC POLE AND ADAPTER – INFORMATION

The CONNECTOR was originally developed for the American market. The thread is therefore designed for American sizes:  $\frac{3}{4}$ -5 ACME. The thread must be at least 40 mm long.

Suitable telescopic poles are available on the market such as the „EXTEND-A-REACH“ with 0.5 to 0.9 m extension. Alternatively, an adapter can be used, such as the TYRON threaded handle end piece or Vikan adapter,  $\varnothing$ 25 mm, 85 mm.
