Light is reliable

OPTOTRONIC® LED drivers for  
indoor and outdoor applications

Flexible and versatile constant-current and constant-voltage drivers

Light is OSRAM

**OSRAM**

# Always an excellent choice

With our OPTOTRONIC® LED drivers, you benefit from high-performance products that are characterized by high reliability, efficiency, flexibility and quality.

LED lighting becomes more and more attractive. High efficiency, energy savings and a modern design are just a few of the many advantages that make these systems increasingly popular. In addition, LED lighting also allows you to create an impressive ambience with colored accents (RGB) and, thanks to Tunable White, you can easily achieve a sequence of white light based on the circadian rhythm.

For the implementation of dynamic lighting scenarios, LED drivers with DALI interface are usually used. The LEDs (light-emitting diodes), however, need sufficient current to provide the required brightness (constant-current systems). Alternatively, they need a constant voltage of 12 or 24 volts to achieve their brightness data. Both the operating current and the constant voltage have

very narrow tolerances and therefore have to be limited in order not to damage the LEDs. The operating system, which normally consists of one or several LED modules as well as one or several LED drivers, is a perfectly matched system that has to meet certain requirements. The LED drivers are the connection to the mains supply – they provide the basis for failure-free and optimum operation of the LED lighting solutions.

Thanks to different wattages and a comprehensive range of designs, you can quickly and easily find the ideal system for the respective application.

## Your benefits

- 1. Maximum reliability** thanks to long experience: Re-use of know-how from well-proven OSRAM ECGs (electronic control gears) such as HALOTRONIC®, POWERTRONIC® and QUICKTRONIC®.
- 2. High energy efficiency:** Up to 92 % (full load) and further energy saving with proprietary OSRAM light management systems (LMS).
- 3. Freedom of design:** Same driver for built-in and independent mounting through optional kits, small form factor similar to traditional ECGs.
- 4. Wide product portfolio:** Various product families, window drivers, dimmable products and different wattages.

## Future-proof solutions

Using OPTOTRONIC® drivers not only means using durable, high-performance products but also staying flexible in terms of future applications: OPTOTRONIC® drivers can be perfectly adjusted to their respective tasks and, if required, also be optimized later on by means of top-quality accessories (e.g. cable clamps) from OSRAM.

# Key component for LED systems

LED drivers are a key component in LED solutions. Thanks to the diversity of the OPTOTRONIC® portfolio, you can meet all requirements – both in indoor and outdoor applications.

## Maximum choice

### OPTOTRONIC® constant-voltage LED drivers (24V/12V)

In combination with the flexible LED strips LINEARlight Flex® and VALUE Flex® from OSRAM, OPTOTRONIC® LED drivers with a constant output voltage of 24 V or 12 V allow you to realize almost any lighting solution – from decorative indirect, accent and cove lighting to direct general lighting. They are available in a wattage range of up to 240 W. For system operation, you have to ensure that the output of the used Flex strip does not exceed the maximum output of the LED driver. Furthermore, in case of partial load operation, you also have to consider the minimum load of the used LED driver. In this product spectrum, the OPTOTRONIC® portfolio includes LED drivers with integrated control interface (DALI, 1...10V, EASY) as well as with externally combinable control units (DALI, DMX, 1...10V). Electrical isolation between the primary and secondary side (SELV, SELV-equivalent) and reversible overload, short-circuit and overtemperature protection mechanisms enable safe and reliable LED system installation.

### Compact OPTOTRONIC® constant-current LED drivers, indoor

- OPTOTRONIC® Intelligent DALI window drivers
- 4 ON/OFF driver families:
  - OPTOTRONIC® FIT LT2, window driver (SELV)
  - OPTOTRONIC® FIT CS G2, 4 selectable currents (SELV)
  - OPTOTRONIC® FIT CS G1, 3 selectable currents (SELV)
  - OPTOTRONIC® ECO, 3 selectable currents (SELV)
- OPTOTRONIC® ECO PC
 

Dimmable via phase-cut (10–100 %, depending on dimmer)

### Linear OPTOTRONIC® constant-current LED drivers, indoor

- OPTOTRONIC® Intelligent DALI window drivers are based on a digital platform and are fully programmable
- 4 ON/OFF driver families:
  - OPTOTRONIC® FIT LT2 DL, window driver (non-isolated)
  - OPTOTRONIC® FIT DL, fixed current (non-isolated)
  - OPTOTRONIC® FIT CSL G2, 4 selectable currents (SELV)
  - OPTOTRONIC® FIT CS L, 3 selectable currents
- SELV and non-isolated versions

### OPTOTRONIC® constant-current LED drivers, outdoor

Long life, low maintenance and high efficiency are very important for outdoor applications. OPTOTRONIC® outdoor LED drivers fulfill these expectations and exploit the advantages of LED-based light sources.

## Compact OSRAM constant-current LED drivers, indoor

OT cable clamp  
B-STYLE TL  
4052899**530997**  
50 x 67 x 22

A small, rectangular component with a ribbed base and a smooth top surface, colored orange and white.

<b>Product name</b>	OT cable clamp D-STYLE
<b>Product number</b>	4052899077904
<b>Dimensions</b>	38.5x33x29.5
<b>L x W x H [mm]</b>	
<b>Standard pack</b>	40
<b>[pcs.]</b>

Tuner4TRONIC®

Software suite for OEM use to configure all programmable OPTOTRONIC®, QUICKTRONIC® and POWERTRONIC® drivers in the luminaire manufacturing process.

- Best suited for programming in luminaire manufacturing
- For quick manual as well as automatic programming
- Works with DALI magic and OT Programmer hardware
- Easily enables pre-parameterization, also when using the pre-parameterization service from OSRAM

1) At max. T<sub>c</sub> temperature, max. failure rate of 10 %

2) Operating at 10 °C lower than max. T<sub>c</sub>, max. failure rate of 10 %

\* 1. If the LED driver complies with protection class I, it is suitable for protection class I luminaires.

2. If the LED driver complies with protection class II, it is suitable for protection class I and class II luminaires.

\*\* Hybrid dimming \*\*\* DALI Edition 2 version, AM-Dimming

3) DC-Voltage range 176 V...276 V

4) For current status of certificates and approvals, see product datasheet online

OSRAM DALI ECGs and DALI LED drivers strictly adhere to the DALI standard. They are compatible with control gears and BUS systems from established providers.

Touch DIM® LS/PD LI sensors implement presence- and daylight-dependent lighting control without an additional control unit.

OSRAM DALI control gears ensure optimum operation by monitoring energy consumption, lamp/module burn time, overvoltage and ECG operating temperature.

**Corridor Function**  
In all OSRAM DALI ECGs a directly adjustable lighting profile defines the extent to which brightness values are retained when a person leaves the room.

With this function, up to 20 DALI ECGs can easily be switched and dimmed by standard push-buttons.

Amplitude dimming technology enables mobile-camera-friendly dimming from 100% to 1% with lowest current ripple

**EL**  
Due to this function, OSRAM DALI control gears automatically detect DC voltage. When DC voltage is detected, a certain luminous flux is implemented (emergency light).

The activated CLO function enables constant luminous flux over the complete LED lifetime. This also saves power and protects the LED modules.

**OSRAM Guarantee**  
All details on relevant guarantees (3 or 5 years) and the general requirements can be found at: [www.osram.com/guarantee](http://www.osram.com/guarantee)

All OPTOTRONIC® OTi DALI, OTi and OT FIT constant-current LED drivers stand for a high quality of light thanks to a low ripple @ 100Hz (< 10%).

### OPTOTRONIC® 4DIM/DALI Constant current, programmable

- 4DIM functionality in one device (StepDIM, AstroDIM, MainsDIM, DALI)
- Very high efficiency and reliability
- High surge protection: up to 8kV (protection class I or II)
- Great flexibility due to wide operating temperature range of -40...55 or 60 °C
- Vibration- and humidity-protected (varnished, IP20)
- Output current range: up to 1,050 mA
- Flexible current setting with multivendor LEDset2 interface (plug & play)
- Isolated DALI interface for bidirectional telemanagement systems
- Constant lumen function
- Overtemperature protection via external NTC and LEDset2 interface
- Suitable for protection class I and II luminaires

1) At max. T<sub>c</sub> temperature, max. failure rate of 10 %

2) Operating at 13 °C lower than max. T<sub>c</sub>, max. failure rate of 10 %

3) Operating at 15 °C lower than max. T<sub>c</sub>, max. failure rate of 10 %

4) Operating at 10 °C lower than max. T<sub>c</sub>, max. failure rate of 10 %

5) For current status of certificates and approvals, see product datasheet online

\* 1. If the LED driver complies with protection class I, it is suitable for protection class I luminaires.

2. If the LED driver complies with protection class II, it is suitable for protection class I and class II luminaires.

#### OPTOTRONIC® 2DIM/0-10 V LED (IP64) Constant current, programmable

- 2DIM functionality in one device (AstroDIM, 0–10V)
- High efficiency and reliability
- High surge protection: up to 6kV (protection class I or II)
- Great flexibility due to wide operating temperature range of -40...55 °C
- High ingress protection (IP64)
- Output current range: up to 1,400 mA
- Fast programming without mains voltage
- Flexible current setting with multivendor LEDset2 interface (plug & play)
- Isolated 0–10V interface for unidirectional telemangement systems
- Constant lumen function
- Overtemperature protection with external NTC or LEDset2 interface
- Suitable for luminaires of protection classes I and II

#### OPTOTRONIC® ON/OFF (IP65) Constant current

- High efficiency and reliability
- High surge protection: up to 6kV (protection class I)
- Great flexibility due to wide operating temperature range of -40...55 °C (OT 200...-40...50 °C)
- High ingress protection (IP65)
- Integrated overtemperature protection

#### Disclaimer:

For complete electrical information, please refer to the individual data sheet.

More information on the Tuner4TRONIC® software can be found on the back and at: [www.osram.com/t4t](http://www.osram.com/t4t)

## OSRAM constant-voltage LED drivers (24V/12V)

Tuner4TRONIC®

Software suite for OEM use to configure all programmable OPTOTRONIC®, QUICKTRONIC® and POWERTRONIC® drivers in the luminaire manufacturing process.

- Best suited for programming in luminaire manufacturing
- For quick manual as well as automatic programming
- Works with DALI magic and OT Programmer hardware
- Easily enables pre-parameterization, also when using the pre-parameterization service from OSRAM

1) At max. T<sub>c</sub> temperature, max. failure rate of 10 %

2) Operating at 10 °C lower than max. T<sub>c</sub>, max. failure rate of 10 %

\* 1. If the LED driver complies with protection class I, it is suitable for protection class I luminaires.

2. If the LED driver complies with protection class II, it is suitable for protection class I and class II luminaires.

3) For current status of certificates and approvals, see product datasheet online

4) Device Type Eight
