

SBR

AI

100<->500 KG

Base a pavimento realizzata in gomma riciclata SBR dotata di profilo in alluminio annegato sulla base durante lo stampaggio. Assorbimento ottimale delle vibrazioni e dei rumori grazie alla mescola utilizzata, che ne garantisce la stabilità e la lunga durata nel tempo.

VANTAGGI

Realizzato per sostenere le macchine più pesanti. Portate elevate garantite. Soluzione ideale per molteplici installazioni: piccole unità refrigeranti, pompe di calore, canaline portacavi e tubazioni. Provvisto di predisposizione per il fissaggio a terra e fondo scavato per il drenaggio dell'acqua.

[EN]

Ground base made from SBR recycled rubber provided with aluminium profile recessed into the top face during the moulding. Bottom surface hollowed for water drainage. Great absorption of vibrations and noises thanks to the used granules which guarantee the stability and the long-term resistance.

ADVANTAGES

Ideal solutions for various installations: condensing units, air source heat pumps, pipe work and cable trays.

[FR]

Support au sol fabriqué en caoutchouc recyclé SBR et équipé avec un profil en aluminium emprisonné sur la base pendant l'étampage. Absorption optimale des vibrations et bruits grâce au mélange utilisé qui garantit stabilité et longue durée.

AVANTAGES

Réalisé pour supporter les machines plus lourdes. Charges élevées garanties. Solution idéale pour installations différentes: petites unités de réfrigération, pompes à chaleur, goulottes et canalisations. Fond creusé pour évacuation de l'eau et predisposition pour la fixation au sol.
