

**EU Declaration of Conformity
for SPX FLOW APV W+ PUMPS
according to EC Directives 1935/2004, 10/2011 and 2023/2006**

We herewith declare that the W+, WI+, WS+, WHP+ Pumps and TPM 1&2 Mixers including their component parts with food contact comply with the provisions of:

- the Directive 1935/2004/EC for food contact materials
- the Directive 10/2011 for synthetic materials with all supplements / appendices. The seal materials out of elastomers and Silicone used by SPX FLOW are exempt from the Directive. The PTFE parts applied comply with the Directive. Migration details can be provided upon request

We certify that the processed foodstuffs are not harmfully influenced by the materials used in our pumps if used as intended. They do not emit substances which could be hazardous to health or harmful to foodstuffs.

The material surface of our pumps consists of stainless steel of the material groups 316 (V4A), 304 (V2A), seals are made of EPDM, HNBR, FPM and PTFE. The polymer seal materials are FDA – conform. The rubber seal materials comply with FDA 21 CFR 177.2600. The PTFE seal material complies with FDA 21 CFR 177.1550. As food consumer goods they are in accordance with the provisions of Ordinance (EC) 1935/2004.

„Food Grade“ lubricants approved by us comply with FDA 21 CFR 178.3570.

The traceability of the pumps with food contact supplied is provided in every respect (Art. 17, Ord. (EC) 1935/2004).

It is certified that we manufacture our products on the basis of Good Manufacturing Practice according to Ordinance (EC) 2023/2006 (GMP Directive) and that our products are marketable within the European Community.
