- 1 - preverite premo in odprite vse zaponke;
- 2 - oblecite ramenski pas, kot bi ga oblekli v telovnik;
- 3 - Zaprite prsno zaponko;
- 4.1 | 4.2 - Pas prestavite med noge in zaprite sponko.

Po zapiranju se prečijate, da je tesno;

5.1 | 5.2 - Pripravljen za uporabo.

The diagram illustrates a roof structure. The top part shows a cross-section of a roof with a pitch of $\text{MAX. } 30^\circ$, indicated by a dashed arc and a green checkmark. The width of the roof base is labeled $\text{MAX. } 3 \text{ m}$. The bottom part shows a vertical section of the roof with points A, B, C, D, and E. A red line represents the roof slope, and a black line represents the vertical wall. A person is shown climbing the wall. Below the diagram, the formula $A+B+C+D+E > 6M$ is displayed in a yellow box, followed by the calculation $1.55 \text{ m} + 1 \text{ m} + 0.75 \text{ m} + 1.7 \text{ m} + 1 \text{ m} = 6 \text{ m}$.

- 1 - Check your harness and open all buckles.
- 2 - Put on the shoulder harness like you would put on the vest;
- 3 - Close the chest buckle;
- 4 - Close the ventral buckle;
- 5 - Pass the strap between your legs and close the buckle.
- 6 - After closing all buckles make sure that all of them are tight;
- 7 - Ready to use.

(BG)	1 - Проверете срута на си и отворете всички катарамы. 2 - Облечете раменния колан, както бележе словесния материал. 3 - Затворете катарамата на гърдите; 4 - Затворете централната катарамы; 5 - Проверете каквато катарамы между краката си и затворете закопчалката; 6 - След затваряне на всички катарамы се уверете, че всички те са стегнати; 7 - Готове за употреба. Figure 1: Diagram of a prosthetic arm with a myoelectric prosthesis. The diagram shows a cross-section of the arm with a myoelectric prosthesis attached to the forearm. The prosthesis is labeled 'Myoelectric prosthesis' and 'Myoelectric control system'. The diagram illustrates the connection between the myoelectric prosthesis and the myoelectric control system, which is shown as a box with a red arrow pointing to the prosthesis. The diagram also shows the myoelectric control system connected to a myoelectric control system, which is shown as a box with a red arrow pointing to the prosthesis.

Diagram illustrating the steps for putting on a safety harness:

1. Holding the harness.
2. Putting on the leg loops.
3. Buckling the leg loops.
4. Buckling the waist.
5. Buckling the chest.
6. Buckling the back.

A detailed inset shows the back buckles being secured.

The infographic is divided into several sections illustrating the correct and incorrect use of a fire extinguisher:

- Top Left:** A diagram of a fire extinguisher with a red dashed box around the handle and trigger, indicating the correct grip.
- Top Right:** Three diagrams showing hand positions. The first shows a correct grip. The second shows an incorrect grip with a red 'X'. The third shows an incorrect grip with a red 'X' and a red arrow pointing to the trigger.
- Middle Left:** A diagram showing a hand holding the extinguisher correctly, with a red arrow pointing to the trigger.
- Middle Right:** A diagram showing a hand holding the extinguisher incorrectly, with a red 'X'.
- Bottom Left:** A diagram showing a hand holding the extinguisher correctly, with a green checkmark. Below it, a diagram shows a hand holding the extinguisher incorrectly, with a red 'X'.
- Bottom Center:** A diagram of a person's torso with a red 'X' over the chest area, indicating that the extinguisher should not be used on the face or chest.
- Bottom Right:** Three diagrams of a person's torso showing the correct and incorrect target areas for the extinguisher. The first diagram shows the extinguisher being used on the chest, marked with a red 'X'. The second diagram shows the extinguisher being used on the abdomen, marked with a green checkmark. The third diagram shows the extinguisher being used on the face, marked with a red 'X'.

(FS243.03 + FS243.05)

FS227 | FS2010

- Check your harness.
- Put on the harness in the waist area and legs straps rear.
- Close the legs insert buckle (click) and adjust it.
- Tighten/adjust the bar buckle in the waist area and in the legs buckles;
- Put on the shoulder harness like you would put on the vest. Closed the insert buckle and tight it;
- Insert the carabiner (EN362) on the ventral loop to unify the two parts and be sure that it is properly closed; Tight the two side chest bar buckles;
- Finally tight the strap of the rear bar buckle;
- If you need to separate the parts follow the steps as the picture shows.

- 1 - Проверете вашата сграда.
- 2 - Обичане срути в областта на талията и презаремките на краката;
- 3 - Затворете заволичката на краката (царамент) и я регулирайте;
- 4 - Сгетете / регулирайте заволичката на щантата в областта на краката и в кити;
- 5 - Обичане равенния колан, който бихте сложили жилетката. Затворете заволичката на колана и я сгетете;
- 6 - Поставете краковите (EN362) върху централния колан, да обедини двете да уверите, че е правилно затворено; Сгетете двете странични катарани на краковите;
- 7 - Навързайте лентата на заволичката на задната щанга;
- 8 - Ако трябва да оделите чалките, следвайте съпътните, които показва снимките.
