

Product information

Fiber optic splice tray BKT Classic-2

Card No.: PI_11320030.3_01.21

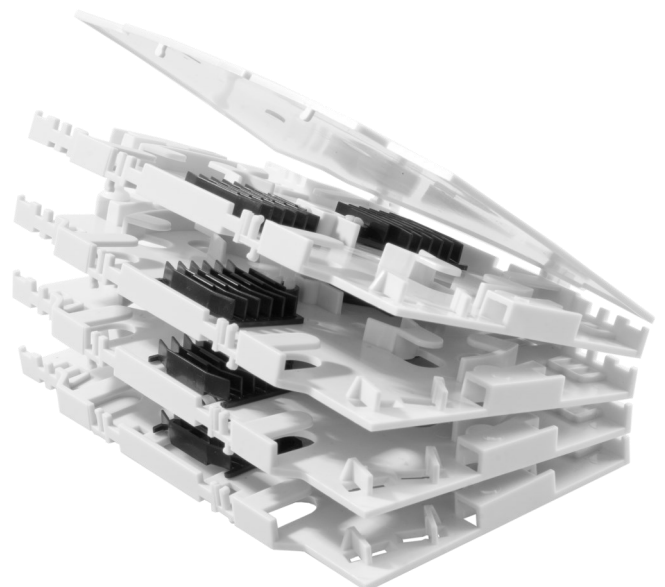

Application

Fiber optic splice trays enable comfortable and safe management of permanent fiber optic connections in heat shrink splice protection sleeve or aluminum splice protection sleeve. The design of the splice tray allows you to store the supply of optical fibre while maintaining the bending radius required by the standards in an aesthetic form.

Features

- Improved in many features version of the BKT Classic-1 tray, maintaining the same external dimensions
- The increased distance of the "tabs" (holding the fibers) from the splice protection sleeves holders, in relation to the BKT Classic-1 tray model, allows you to avoid fiber macrofolding and allows comfortable embedding of the covers in the handles even close to the edge of the tray
- Integrated hinges enable the installation of several splice trays in a stack and comfortable tilting them during assembly or service
- Integrated latches to prevent accidental removal of the splice tray from the stack or unhooking the lid
- Capacity: 24 splice protection sleeves per splice tray
- 2 holders for heat shrink splice protection sleeve in each splice tray. Each holder can accommodate 12 heat shrink splice protection sleeves (in two rows) with a length of 40-60mm (recommended 40-45mm) and diameter after shrinking to 2.5mm
- Possibility to mount 4 splice trays plus a lid on the last splice tray in 1U fiber optics panel, e.g. 96 LC ports in 1U fiber optics panel
- Interchangeable splice protection holders, the possibility of mounting alternative holders
- Mounting with screws to the housing base (desirable when using the hinge) or on the rod
- Lid included
- Lid dimensions: 155x92x8mm
- Colour: white
- Material: ABS

Product information

Fiber optic splice tray BKT Classic-2

Card No.: PI_11320030.3_01.21

Performance / Variants

Index	Product description
11320030.3	Fiber optic splice tray BKT Classic-2, 155x92x8mm, 2 holders x12 splice protector 2.5mm diam./45-35mm length, white

Accessories

Index	Product description
11320353	Heat shrink splice protection sleeve, 45mm length, 2.5mm outside diameter after shrink (50pcs)*
11320363	Heat shrink splice protection sleeve, 60mm length, 2.5mm outside diameter after shrink (50pcs)*

The index applies to a set of 50 pcs. Package contains 50 pcs.
