

CE-conformity — Reka power cables $\leq 0.6/1(1.2)$ kV

European Community legislation requires that electrical equipment of a rated voltage of 50–1000 V (a.c.) or 75–1500 V (d.c) may be made available on the European Economic Area (EEA) market only if, having been constructed in accordance with good engineering practice in safety matters in force in the Union, it does not endanger the health and safety of persons and domestic animals, or property, when properly installed and maintained and used in applications for which it was made. For the declaration of conformity the manufacturer must label the product packaging with a CE-mark. This requirement is not optional but compulsory.

Reka Cables LTD hereby declares that

- power cables manufactured by Reka Cables LTD for use within the European Economic Area that have
- a rated voltage of 50–1000 V (a.c.) or 75–1500 V (d.c.) are designed and produced in conformity with the safety objectives given in Article 3 of
- the Directive 2014/35/EU of the European Parliament and of the Council on the harmonisation of the laws of the Member States relating to the making available on the market of electrical equipment designed for use within certain voltage limits.

In order to comply with the safety objectives, the product standards and technical specifications that were applicable to the technical product information at the time of production have been applied in the design and production of the product or product family. They are also cited in product information published by Reka Cables LTD.

Indication of CE-conformity

Conformity with the requirements of the Directive 2014/35/EU is indicated with a CE-mark labelled by Reka Cables LTD on its product packaging.

Reka Cables LTD's procedures for CE-marking and relevant internal data files concerning an individual product are in line with EN-ISO 9001 Quality Management System.
