

# Flexible Edge Strip for Sanitary Ceramics

## The bag includes:

- 3 x flexible edge strips 50 cm
- 4 x mounting screws Ø6 x 100 mm
- 4 x rawl plugs Ø8
- 4 x centring bushings and white plastic cover caps
- 1 x connection hose  
1½" x 1½" x 400 mm in white

**The surface of the toilet must be thoroughly cleaned and completely dry.**

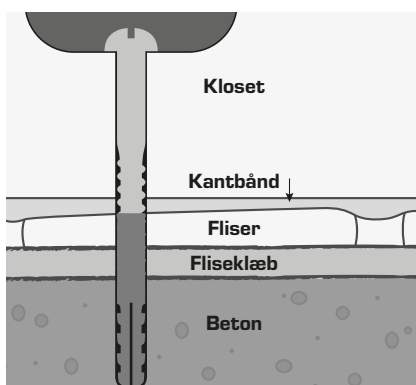

**1.** Remove the brown protective paper from the edge strip.

**2.** Place the flexible edge strip onto the toilet, as displayed in the picture, with the sticky side facing down towards the toilet along its outer edge.

**3.** Cut or shear off any excess edge strip with sharp scissors or a knife so that the edges match.

**4.** The balancing effect of the flexible edge strip.

**5.** The flexible edge strip can be adapted to even very sharp curves.

**6.** By removing one or more "teeth", the flexible edge strip can bend to 90°.

**7.** Once the toilet is fitted, grout it with sanitary silicone.

## Multiple potential applications

The flexible edge strip is also an ideal choice for installation on sinks as well as wall-hung closets between the porcelain ware and the wall.
