

Product Information

Fiber optic panel 19" 1U BKT VENI, equipped
Card No.: PI_23XXX_03.22

Application

The series of VENI-2 fibre optic products is designed for the most demanding customers. The increased functionality of the panels combines state-of-the-art design with quality manufacturing materials.

The VENI-2 fibre optic panel is an essential connectivity component in all networks when proper protection of transmission infrastructure is of great importance. It is intended for quick crossing of connections between distribution points. The perfectly arranged base of the panel, in combination with a wide range of additional accessories, makes this the perfect solution for Data Center systems and wherever connection of optical fibres under difficult installation conditions is required.

As a total solution our VENI-2 fiber optic panels are also available fully equipped with pigtails, adapters and splice trays. This fully loaded version dramatically reduces installation time in new or existing telecommunications networks.

Features

- Adjustable handles with a possibility of assembly on the front or back of the panel
- A universal housing and base that allows the drawer to be pulled out with or without optional telescopic ball bearing slides
- 2 ways opening flat and angled
- Five rear cable entries
- Front plates equipped with metal captive screws
- A wide range of front plates for various types of adapters
- Rised slots in base for mounting cables and tubes with different outer diameters
- Can be equipped according to customer demands
