MIXVENT TD / MIXVENT TD-T

MIXVENT TDx2

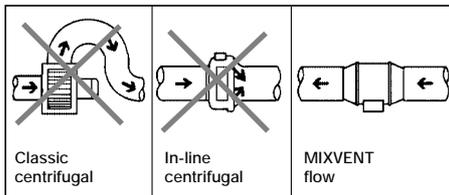

ACCESSORIES

Description

The MIXVENT system has been designed to compliment the MIXVENT-TD range of in-line fans. All MIXVENT -TD fans include the combination of a powerful motor factory matched to a mixed flow impeller. This motor and impeller combination enables the MIXVENT-TD fans to deliver high airflow performances with the minimum of noise generation against high static pressures typically found in ducted ventilation systems.

The unique design of the MIXVENT TD and TDx2 support brackets, allows the motor and impeller assembly to be fitted or removed without dismantling the adjacent ducting and therefore facilitating any installation or maintenance.

The internal aerodynamic design of MIXVENT-TD fan enables the unit to generate large air volumes and pressures with the minimum of in-duct or radiated noise.

An additional advantage of the MIXVENT TD fans is that they are fitted with direct connection two speed motors as standard. In addition, all motors are suitable for speed control regulation using electronic or auto-transformer controllers. The MIXVENT-TD fans offer the ideal in-line duct fan solution for a wide range of HVAC ventilation applications.

Range

The MIXVENT system includes 3 ranges of products:

- MIXVENT TD, Single Fan Unit
- MIXVENT TDx2 , Twin Fan Unit
- MIXVENT TD-T, Twin Fan Unit with Overrun Timer

The **MIXVENT-TD** consists of eight (8) nominal sized in-line fans. All models are specifically designed for direct connection in-line with industry standard diameter circular ducting.

The **MIXVENT-TDx2** range consists of two MIXVENT TD fans mounted in series to produce almost twice the pressure of a single TD fan. The range consists of 5 nominal fan diameter sizes.

The **MIXVENT-TD-T** consists of a range of five (5) nominal size TD fans (160, 250, 350, 500 and 800) fitted with an Run-On-Timer adjustable between 1 to 30 minutes. (The MIXVENT TD-T range is not suitable for speed control.)

Accessories

The MIXVENT System includes a specific range of accessories enabling the installation of different combinations of the MIXVENT TD and MIXVENT TDx2 fans, using models 350, 500, 800 and 1000.

These combinations include:

MIXVENT Twin

Two MIXVENT TD fans mounted in parallel using the Twin Base Kit. Mounting the fans in parallel produces double the duty of one fan (at the same pressure).

MIXVENT Twin x 2

Two MIXVENT TDx2 fans mounted in parallel using the Twin Base Kit.

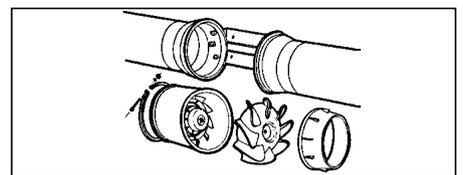

Mounting the fans in parallel produces double the duty of a single TDx2fan (at the same pressure).

MIXVENT Twin x 3

MIXVENT-TD and MIXVENT TDx2 mounted in series using the Flange (MBR). The pressure achieved by this arrangement will produce almost three times that of a single unit (at the same air volume).

To compliment the MIXVENT System a range of electrical and additional mechanical accessories are available to complete the most demanding installations.

Construction

The MIXVENT TD models are manufactured in tough reinforced plastic, except models 160, 1000, 1300 & 2000 which have a steel casing and are finished in a tough epoxy-polyester paint coating.

The TD fan duct connection flanges are manufactured from reinforced plastic, except for models 800, 1000, 1300 & 2000 which are constructed from epoxy-polyester coated sheet steel.

Impellers

The impeller blades are moulded in tough ABS plastic except models 1000, 1300 and 2000 which are constructed from pressed galvanised sheet steel.

Motors

Models 160, 250 and 350 include:

- Single-phase, 230V 50Hz, shaded pole induction asynchronous motor with squirrel cage rotor in die cast aluminium. All motors include direct two speed connection and are also suitable for voltage speed control*.
- Manufactured in accordance to standards UNE 20-113 and CEI 34-1.
- Class II electrical insulation (model 160) and Class I (models 250 and 350)
- IP 44 Protection
- Class B Motor Insulation with Humidity Protection
- Safety Thermal Overload Protection (fuse type)
- Self-lubricating sleeve bearings.

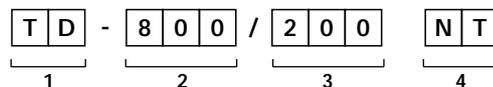

Models 500, 800, 1000, 1300 and 2000 include:

- Single-phase induction asynchronous motor, with permanent capacitor and external rotor in die cast aluminium. All models include direct two speed connection and are also suitable for voltage speed control*.
 - Manufactured in accordance to standards UNE 20-113 and CEI 34-1.
 - Class I electrical insulation.
 - IP 44 Protection
 - Class B Motor Insulation with Humidity protection
 - Thermal Overload Protection (automatic reset type).
 - Sealed For Life, ball bearing assemblies.
- *Except TD-T models.

MIXVENT SYSTEM - COMBINATIONS

MIXVENT Twin

Twin

Twin with back-draft shutter accessories

Components

| |
|--------------------------------------|
| Kit Twin Base-250 + 2 TD -160/100 |
| Kit Twin Base-250 + 2 TD 250/100 |
| Kit Twin Base-350 + 2 TD -350/125 |
| Kit Twin Base-500/150 + 2 TD-500/150 |
| Kit Twin Base-500/160 + 2 TD-500/160 |
| Kit Twin Base-800 + 2 TD-800/200 |
| Kit Twin Base-1000 + 2 TD-1000/250 |
| Kit Twin Base-1000 + 2 TD-1300/250 |
| Kit Twin Base-2000 + 2 TD-2000/315 |

For back-draft shutter see accessories.

MIXVENT Twin x 2

Twin x 2

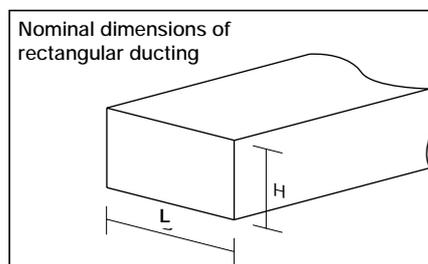

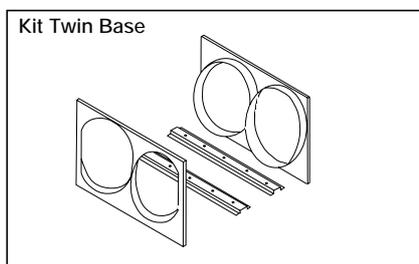

Twin x 2 with back-draft shutter accessories

Components

| |
|--|
| Kit Twin Base-350 + 2 TDx2-350/125 |
| Kit Twin Base-500/150 + 2 TDx2-500/150 |
| Kit Twin Base-500/160 + 2 TDx2-500/160 |
| Kit Twin Base-800 + 2 TDx2-800/200 |
| Kit Twin Base-1000 + 2 TDx2-1000/250 |
| Kit Twin Base-1000 + 2 TDx2-1300/250 |

For back-draught shutter see accessories.

Description

| Model Type | L x H (mm) |
|---------------------------|------------|
| Kit Twin base - 250 | 280 x 140 |
| Kit Twin base - 350 | 280 x 140 |
| Kit Twin base - 500 | 355 x 180 |
| Kit Twin base - 800 | 400 x 200 |
| Kit Twin base - 1000/1300 | 500 x 250 |
| Kit Twin base - 2000 | 630 x 315 |

The independent operation of two TD or TDx2 fans requires the use of back-draft shutters at the discharge (outlet) in order to prevent the air recycling through a stationary fan.

MIXVENT-TD System Accessories

Filtration Box MFL

The MFL range of in-line heavy duty cabinet filters of type EU3 grade filtration are designed for direct connection with standard circular ducting.

MBE, Electrical Heater Batteries

The MBE electric heater battery sections are designed to be installed on the discharge side of the MIXVENT-TD fans. The units incorporate insulated (black heat) element rods (230V – 3W/cm²) with an automatic integrated overheat thermostat (set at 90° C). This thermostat in turn is wired in series with an additional safety overheat manual reset thermostat (set at 120° C). In the case of the unit overheating the second thermostat will switch the unit off, after which the heater can then be "Reset" manually via the push button switch. All wiring terminations and connections are located on the side of the heater casing.

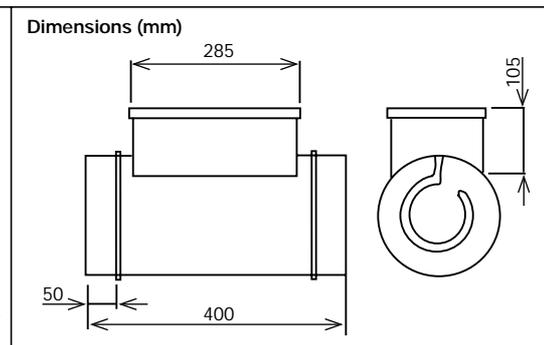

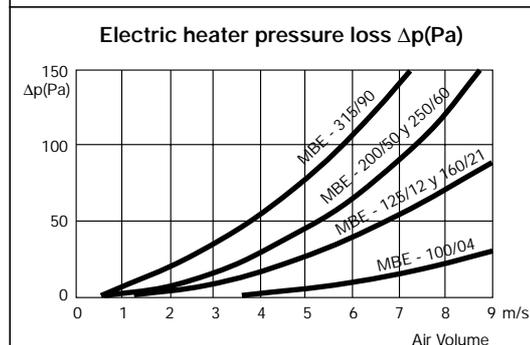

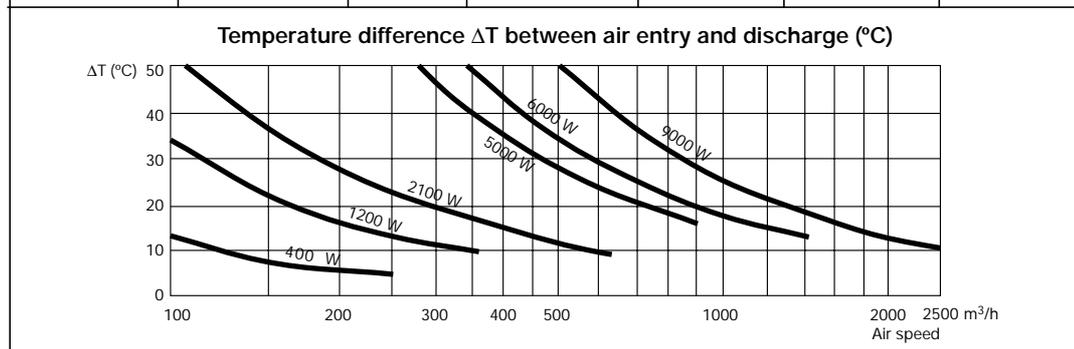

The heaters are available for single phase (models MBE 100, 125 and 160) or three phase (models 200, 250 and 315) electrical supply connection in conjunction with appropriate circuit protection.

- All units are supplied with an IP43 rated wiring enclosure.
- The minimum air velocity through the heater batteries must be ≥ 1.5 m/s.

A range of controllers accessories to accompany the electric heater range are available. These controllers accessories modulate the heater output as a function of the required environmental temperature (see Electrical Accessories section of this catalogue).

■ Installation accessories

Grilles - MRJ

Mounted at the inlet or outlet of the fan, the MRJ grille prevents the entry of any foreign objects.

| Type | TD, TD x 2, TD x 3 |
|---------------|---------------------|
| MRJ - 250 | 160/100N - 250/100 |
| MRJ - 350 | 350/125 |
| MRJ - 500/150 | 500/150 |
| MRJ - 500/160 | 500/160 |
| MRJ - 800 | 800/200 - 800/200N |
| MRJ - 1000 | 1000/250 - 1300/250 |
| MRJ - 2000 | 2000/315 |

Rectangular Duct Adapters - MAR

The MAR adapter enables the MIXVENT TD, TDx2 or TDx3 to be connected to rectangular ducting.

| Type | TD TD x 2 TD x 3 | Nominal dim. of ducting L x H in mm |
|---------------|------------------------|---|
| MAR - 250 | 160/100N - 250/100 | 224 x 140 |
| MAR - 350 | 350/125 | 224 x 140 |
| MAR - 500/150 | 500/150 | 280 x 180 |
| MAR - 500/160 | 500/160 | 280 x 180 |
| MAR - 800 | 800/200-800/200N | 315 x 200 |
| MAR - 1000 | 1000-1300/250 | 400 x 250 |
| MAR - 2000 | 2000/315 | 500 X 315 |

Back-Draft Shutters - MCA

Mounted at the outlet of the MIXVENT TD and TDx2 fans, the shutter prevents the air re-circulating when the fans are not in use.

| Type | TD, TD x 2, TD x 3 |
|---------------|---------------------|
| MCA - 250 | 160/100N - 250/100 |
| MCA - 350 | 350/125 |
| MCA - 500/150 | 500/150 |
| MCA - 500/160 | 500/160 |
| MCA - 800 | 800/200 - 800/200N |
| MCA - 1000 | 1000/250 - 1300/250 |
| MCA - 2000 | 2000/315 |

MIXVENT-TD FAN KITS

TD-160/100N – TD-250/100 – TD-250/100T

Description

The TD extractor fan ventilation kits enable the simple and fast installation of a complete ventilation system. The kits include the powerful TD in-line fan providing efficient extraction for bathrooms, toilets, washrooms and any other applications that require the removal of bad odours, stuffy and humid air. In addition to the fan the kits include an interior circular air valve (BOC-100); exterior mounted grille (GR-100); three meters of flexible aluminium ducting (GSA-100) and a roll of tough ducting tape to provide the complete hardware required for a given ventilation system.

NEW

Extractor fans TD-160/100N – TD-250/100 – TD-250/100T

TD-160/100N

TD-250/100
TD-250/100T

The TD range of in-line fans incorporate powerful mixed flow impellers which enable efficient and very quiet extraction against the pressures caused by ducting and grilles.

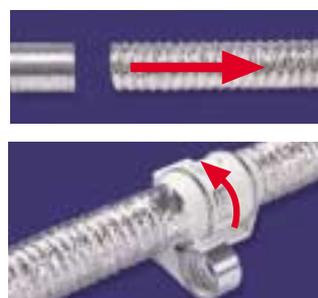

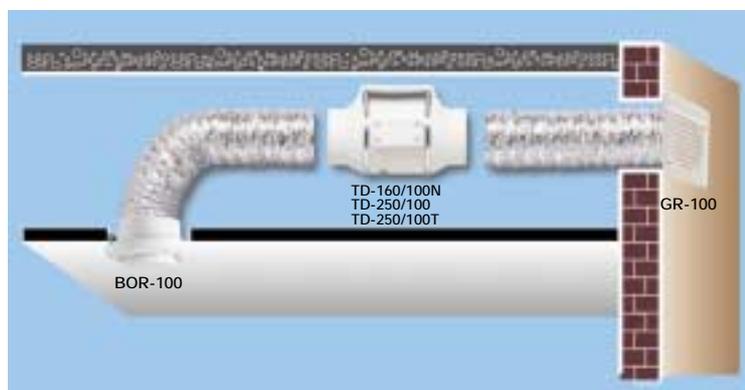

The TD range has been specifically designed with an integrated mounting support which enables the fast installation and access to the motor / impeller assembly without having to remove or disturb the adjoining ducting.

Model TD-250/100T incorporates a Run-On-Timer facility which can be adjustable between 1 to 30 minutes. (factory set to 15 mins)

Technical characteristics

| Model Type | Nom. speed (r.p.m.) | Power abs. at free discharge (W) | Maximum current (A) | Duty at free discharge (m ³ /h) | Maximum operating temperature (°C) | Sound pressure level (dB(A)) | Weight (kg) |
|--------------------------|------------------------|-------------------------------------|------------------------|---|---------------------------------------|---------------------------------|----------------|
| TD-160/100N | 2500 | 35 | 0,25 | 160 | 40 | 18 | 1,4 |
| TD-250/100 – TD-250/100T | 1800 | 89 | 0,26 | 250 | 40 | 24 | 2,0 |

Installation

Accessories included in Kit

GSA-100
Flexible aluminium tubing with adhesive duct tape

GR-100
Exterior mounted grille

BOC-100
Interior circular air valve.
