

CS2500

A total solution for industrial crimping needs

CS2500

Elpress crimp station CS2500 offers effective production with highest operator safety. Advanced intelligent features combined with simplicity make the product unique.

- Designed for continuous production of Cu tube-terminals, 10-300 mm².
- Fast locking and unlocking of terminals, with low force, makes the total crimp cycle short.
- Constructed to give high personal safety.
- High crimping force up to 250 kN, self-adjusting for optimal durability of tool and accessories.
- One crimpcycle regardless crimp size.
- Elpress patented DUAL System is used.
- Elpress Hydraulic pump unit of type PS710D, with foot pedal and with advanced control and supervision is attached.
- CE-approved, fulfilling machine safety regulations.
- PC- software for crimp analysis is available.
