Product information

RENOLIT GREASEWAY CAH 92

Grease

Description

RENOLIT GREASEWAY CAH 92 is a high-quality, waterfree, calcium thickened grease with good water resistance. It is intended for heavily loaded plain and roller bearings. The product provides extended lubrication intervals.

Application

RENOLIT GREASEWAY CAH 92 is recommended for the lubrication of chassis, construction, agricultural and forestry machines, water pumps and similar. The product is also recommended in industrial applications where a water-resistant grease with corrosion protection properties is required. RENOLIT GREASEWAY CAH 92 provides extended lubrication intervals due to optimised properties and performance. The product is recommended within the temperature range -30°C to +120°C, max +130°C.Suitable for up to 2/3 of the speed range according to the main SKF catalogue.

Advantages / Benefits

- Extremely good water resistance and optimized corrosion protection.
- Very good surface adhesion, even when washed down with water.
- Good mechanical stability and contains special additives which effectively protect against wear and high loads.
- Easily pumped in most modern central lubrication systems, despite its relatively high base oil viscosity.

Classifications

ISO 6743: L-XC(F)CIB2 DIN 51502: KP2K-30

RENOLIT GREASEWAY CAH 92

Handling and storage

Avoid skin contact. In the event of contact with skin, wash with soap and water. Dispose of used grease at a recycling station or equivalent. Safety data sheets are available on www.fuchs.com/se or supplied on request.

Typical data

| Characteristics | Method | Value |
|--------------------------------|-------------|---------------|
| NLGI | ASTM D 217 | 2 |
| 4-ball, WL | DIN 51350:4 | 3200 N |
| Base oil viscosity at 100°C | ASTM D 7152 | 95 mm²/s |
| Base oil viscosity at 40°C | ASTM D 7152 | 1370 mm²/s |
| Penetration, worked 60 strokes | ISO 2137 | 265-295 mm/10 |
| Water resistance at 90°C | DIN 51807:1 | 0-90 |

The information contained in this product information is based on the experience and know-how of FUCHS in the development and manufacturing of lubricants and represents the current state of-the-art. The performance of our products can be influenced by a series of factors, especially the specific use, the method of application, the operational environment, component pre-treatment, possible external contamination, etc. For this reason, universally-valid statements about the function of our products are not possible. The information given in this product information represents general, non-binding guidelines. No warranty expressed or implied is given concerning the properties of the product or its suitability for any given application.

We therefore recommend that you consult a FUCHS LUBRICANTS SWEDEN AB application engineer to discuss application conditions and the performance criteria of the products before the product is used. It is the responsibility of the user to test the functional suitability of the product and to use it with the corresponding care.

Our products undergo continuous improvement. We therefore retain the right to change our product program, the products, and their manufacturing processes as well as all details of our product information sheets at any time and without warning, unless otherwise provided in customer-specific agreements. With the publication of this product information, all previous editions cease to be valid.
